

Main grid of numbers from 1 to 10000, with yellow and gray cells representing PPT and PPT+ values. Includes a diagonal sequence of numbers from 1 to 10000.

BBS-ISL Matrix: 50x1000 Showing 24 Factors and the Primitive Pythagorean Triples (PPT)

Yellow = All cells ÷ 24 Yellow-Orange = PPT cells (also ÷ 24) AND PPT + "r-steps" value.

PPT Axis value + "r-steps" value = c + r, e.i. 5 + 2 = 7

While some Rows with Yellow cells are NOT PPT Rows, ALL PPT Rows AND PPT+ "r-steps" Rows ALWAYS fall on ROWS with MULTIPLE Yellow cells: @ 1,5,7,11,13,17,19,..., i.e., ALL PPTs, AND PPT+ "r-steps," ALWAYS fall either side of an Axis Row ÷ by 6! PPTs are shown in GRAY Remember: r=(a+b) - c

SIDE-NOTE For ANY Square: Sum of Opposite Corners = Center/2 For ANY Diamond: Sum of ALL Corners = Center/4

Key Yellow Pattern: + - + - - , + - + - - , + - + - - , ...

(PPT Perimeter + "r-steps")÷2 = (P+r)/2 = c + r, e.i. (3+4+5+2)/2=5+2=7.
